

Application Part Number: SL00199 (Rear Kit)

Developed On: 1999 Lexus LS400 RWD

Recommended Ride Pressure: 65 PSI
(Do not exceed 200 PSI)

Recommended Dampening: 24 Clicks
(Clockwise clicks from full soft)

Recommended Thread Length: 47 mm
(Measurement between lockrings)

Installation Notes:

May need to install other aftermarket suspension arms to go lower.

NOTE: The recommendations and notes in this document were derived from the research and road testing conducted by Bag Riders using the vehicle listed above. If you are installing part(s) on a different vehicle, please ensure that air spring clearances are checked throughout the entire suspension travel range, including fully collapsed (aired out). In regards to dampening and pressure recommendations: these are what we preferred for ourselves. We encourage you to experiment and find your most ideal suspension feel on your personal vehicle. Use our recommendations as a starting point!
