

Application Part Number: SL00201 (Rear Kit)

Developed On: 1992 Mazda RX-7 RWD

Recommended Ride Pressure: 95 PSI
(Do not exceed 200 PSI)

Recommended Damping: 15 Clicks
(Clockwise clicks from full soft)

Recommended Thread Length: 51 mm
(Measurement between lockrings)

Installation Notes:

You may need to trim the nub on the lower control arm if it makes contact with the bottom of the strut.

NOTE: The recommendations and notes in this document were derived from the research and road testing conducted by Bag Riders using the vehicle listed above. If you are installing part(s) on a different vehicle, please ensure that air spring clearances are checked throughout the entire suspension travel range, including fully collapsed (aired out). In regards to damping and pressure recommendations: these are what we preferred for ourselves. We encourage you to experiment and find your most ideal suspension feel on your personal vehicle. Use our recommendations as a starting point!
