

**Application Part Number:**

SL00375 (Rear Kit)

**Developed On:**

1992 Nissan 240SX RWD

**Recommended Ride Pressure:**

40 PSI

(Do not exceed 150 PSI)**Recommended Damping:**

15 Clicks

(Clockwise clicks from full soft)**Recommended Thread Length:**

70 mm

*(Measurement between lockrings)***Installation Notes:**

Inflate sleeve springs to 50 PSI to allow the rubber to inflate correctly before putting the car on the ground.

NOTE: The recommendations and notes in this document were derived from the research and road testing conducted by Bag Riders using the vehicle listed above. If you are installing part(s) on a different vehicle, please ensure that air spring clearances are checked throughout the entire suspension travel range, including fully collapsed (aired out). In regards to damping and pressure recommendations: these are what we preferred for ourselves. We encourage you to experiment and find your most ideal suspension feel on your personal vehicle. Use our recommendations as a starting point!
